## INTRODUCTION

We present herewith our Catalog No. 29 issue of 1929 illustrating a complete line of Iron Curtain Poles, Cornices, Motifs, Brackets, Ends, Poles and Tie Backs.

All of these items come complete ready to install. The Ends come with spring clips which slip into Poles and hold them securely in place. The Motifs also come with special bracket attachment which slips over the pole and by tightening screw is held securely to the pole.

All items are finished in Antique Gold. If special finishes are desired, prices quoted upon request. All items can be had unfinished.

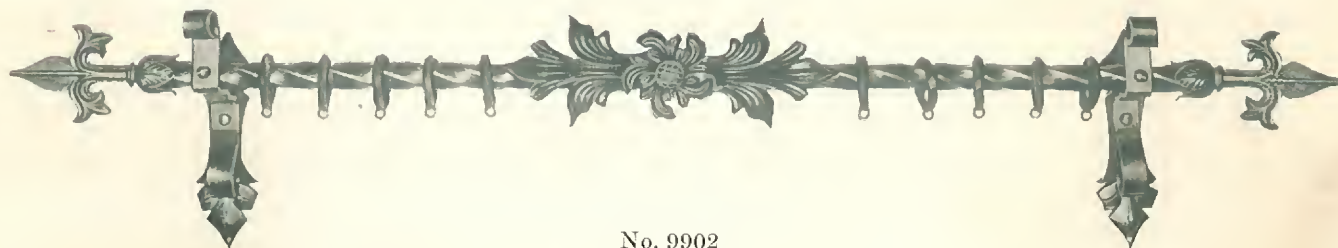

We are also prepared to make up special items from Blue Prints or sketches.

Furnished in any quantity—without finish.

These Studs come in their natural forged stage with nails of from 1" to  $1\frac{1}{2}$ " long depending on size of the head.

In their use for fastening Hardware, studding Colonial, Chinese, and other Wooden Doors, they add Beauty and Charm.

A recently revived and now very popular custom is the installation of wrought-iron Colonial floors with Forged Nails driven at frequent intervals.

Nails are often used as applied Ornament on all manner of Iron Work, such as Fire Bands, Fireplace Hardware and Trim, Bandcourses of Tables, Chairs, etc.

They may be finished to harmonize with the general scheme of decoration in Black, Rusty Iron, Semi-Polish, etc.

## Wrought Iron Drapery Hardware Ready to Install

**M**AKING the claim that our Drapery Hardware is most beautiful in design, of superior quality, and one of the largest to choose from, is but a justifiable assertion.

It includes everything you will need for complete installations, from tubular poles, brackets, pole ends, center motifs, and tie-backs to rings. You can work out original combinations with these items to harmonize with any style of interior decoration.

This folder contains a limited but useful selection of very attractive designs. The line is shown complete in Catalog 29 which will gladly be sent to you upon request.

## Easy to Assemble Parts

The various parts are so designed that all you have to do is to slip them together. Ends come with spring clips, that slip into the pole. Motifs come with a special bracket attachment, that slips over the pole and fastens with a set screw. The pole is also fastened firmly into the brackets with set screws, so that it cannot turn with the weight of the center motif.
